UK Citizen | UK Right to Work

EDUCATION

First Class Honours - BSc Digital Media

University of West England, Bristol
2022–2025

Triple Merit - Business IT

Exeter College
National Diploma in Business IT (QCF)
Level 3 Extended Diploma in Business IT
2018-2020

SKILLS

- **iOS:** Swift, SwiftUI, UIKit, Xcode, Firebase (Auth/Firestore), REST APIs, Git
- **iOS Architecture:** MVVM, MVVM-C (Coordinator pattern), MVC (legacy)
- **UX/UI:** Figma, Wire-framing, Prototyping, User Research
- **Web Development:** HTML, CSS, JavaScript
- **Design Tools:** Photoshop, Illustrator, InDesign
- **Collaboration:** Agile workflows, Team Communication, Presentation
- **Local Persistence:** Core Data (prior), UserDefaults, Keychain

PROJECTS & EXPERIENCE

BrandFounder *11/2025 – Present*

iOS Developer (Swift/SwiftUI) | Product-minded UI/UX
Built and launched an AI-powered iOS app on the App Store using SwiftUI, integrating OpenAI APIs into real product workflows.

Designed feature flows and MVVM architecture for fast iteration and scalability.

Owned product, UX, and end-to-end delivery from concept to release.

Goalsreach *01/2024 – Present*

iOS Developer (Swift/SwiftUI) | Product-minded UI/UX
Designed, built, and shipped Goalsreach to the App Store using SwiftUI + UIKit.

Implemented authenticated app flow and Firebase integration (Auth/Firestore).

Available on the App Store and actively iterating based on feedback.

Bristol Bridge Club *10/2024 - 03/2025*

Web Development For Client
Led a client website redesign from research and high-fidelity Figma prototypes to final implementation.

Delivered the build in a restrictive Pianola CMS while improving usability and visual clarity.

MatchMinded *01/2025 - 04/2025*

UX Prototyping Showcase
Designed a dating app prototype using personality-based matching logic (MBTI + Likert scoring).

Built an interactive flow in Swift with Firebase to simulate matching behaviour and user journeys.

Produced high-fidelity UI in Figma and implemented key screens to validate the experience.

Campus Companion *01/2023 - 05/2023*

UX Prototyping Showcase
Designed and prototyped a student productivity app in Figma. Created user flows, wireframes, and an interactive prototype with a points-based engagement system.

Mobile Application Engineer specialising in native iOS development with Swift, SwiftUI and UIKit. Experienced shipping production features end-to-end: UI implementation from designs, API/Firebase integration, authenticated app flows, and release-ready quality with attention to edge cases and stability. Product-minded and comfortable owning work from prototype to App Store delivery.
